

**Listing of Claims:**

This listing of claims replaces all prior versions, and listings, of claims in the application.

1. (Currently Amended) A cosmetic container comprising: having a hinge portion  
~~coupled rotatably to a container body;~~  
a hinge portion coupled rotatably to the container body;  
a lid that opens and closes the container body;  
~~and comprising a lid which opens and closes the container body, the cosmetic container being~~  
~~characterized by comprising:~~  
a replacement cover provided ~~replaceably~~ on the lid to cover it;  
a through hole formed in the hinge portion and extending towards the replacement cover;  
an engaging body formed within ~~inside~~ the through hole; and  
an engageable body on ~~formed in~~ the replacement cover ~~and~~ inserted into the through  
hole to detachably engage ~~engageably/detachably with~~ the engaging body.

2. (Currently Amended) A cosmetic container comprising: having  
a container body; ~~and~~  
a lid to open and close the container body; ~~it, the cosmetic container being characterized~~  
~~by comprising:~~  
a replacement cover provided ~~replaceably~~ on an outer surface of at least one of the lid and  
the container body ~~to cover it;~~  
a first groove ~~formed by recessing~~ recessed from an outer surface side of the lid or the  
container body;  
an engaging portion formed inside the first groove;

an engageable portion which is flexibly deformable and formed on the replacement cover, and inserted in the first groove ~~to and engageably/detachably engaging~~ the engaging portion; and

a second groove ~~formed by recessing~~ recessed from an inner surface side of the lid or the container body and connected to the first groove, allowing insertion of an article to exert a force on operating power to the engageable portion to flexibly deform the engageable portion ~~engaged to the engaging portion inside the first groove in order to~~ separate the engageable portion break off from the engaging portion.
